

Dear people,

The daily rainfall numbers are now on the NUFG website if you are keen to look at the detail.

The address is as follows:

<http://www.nufg.org.au/images/Kamarooka%20Rainfall%20Excel/Kamarooka%20Rainfall.xls>

The cumulative rainfall graph is attached. The graph is interesting in that it is a straight line.

Total rainfall for the year thus far is 323.3 mm.

All I can say is that the rainfall pattern this year is very unusual.

Why the weather is doing what it is doing is beyond this mere mortal!

Phil
